EVOjackQUADRA

the scissor jack for rally racing

EVOjack Quadra is the **fast hydraulic scissor jack specifically designed for rally racing.**

Made from aircraft billet aluminum and high-strength steel, the **EVOjack Quadra** can be used with any racing car, thanks to the carrier member that **fits the chassis without the need for the insertion hole.**

The removable handle allows to quickly lift the car and to safely turn the release valve; **the lifting arm is inclined to the vertical** in order to follow the natural movement of the car in the lifting phase, ensuring extreme stability during wheel change operations.

EVOjack Quadra is a tool intended solely for racing, designed for advanced users but suitable to beginners also.

TECHNICAL FEATURES

Base	Aircraft billet aluminum
Lifting speed	24 strokes to maximum height
Lifting weight	600 kg
Weight	5.10 kg
Height when closed	16 cm
Extension	39.5 cm
