DAKAR *Zero* 15

the strong wheel for compact 4x4s

DakarZero 15 is the new 15 inch version of the famous DakarZero rim, **specifically designed for compact 4x4s that need a small and durable wheel** in races on rough and demanding terrains.

Thanks to the special design it is possible to obtain low offsets – up to -25 – which allow to widen the track: the mounting of the rim without spacers increases the structural strength and the fatigue resistance of the mechanical components.

DakarZero 15 is available in the 7x15" size with applications in 4, 5 and 6 holes and different offsets that fit all the main off road cars, both for racing and road use.

AVAILABLE SIZES

Size	Min ET	Max ET	Max PCD	Wheight range (kg)
7Jx15"	-25	15	139.7 x 6	8.8 - 9.5

MATERIAL

- Aluminum alloy A356-T6
