

GTR 18"

GTR 18 - For those who want to dominate the track

This wheel was **born for track and drifting races**, where generous tire sizes are essential for the right performance.

Its structure has been designed to offer very **low offsets**, even negative ones, making this wheel suitable to be used on the rear axle, combined with the "sister" Excalibur.

Made of aluminium alloy in low pressure melting and subjected to T-6 heat treatment, GTR 18 is specialized in track, but **can also be used in elegant sportcars for road use.**

MATERIAL

- Aluminum alloy A356-T6

INSERTS

- Taper 60°
- Taper 90°
- Flat

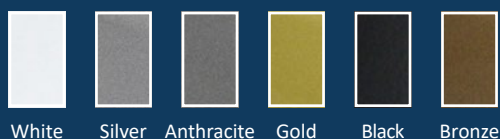

USE

- Tarmac rally
- Circuit
- Road
