### INSERTS

- Taper 90°
- Taper 60°
- Flat

### USE

- Road
- Off-road

### AVAILABLE COLORS

White

Silver

Anthracite

Gold

Black

Bronze

ATLAS NK is the new wheel in EvoCorse's off-road range. It is a durable alloy wheel with a 12-spoke profile that is fully within the tire's rim to protect the spokes and mechanical components from gravel and sand.

The three-coat powder coating gives the wheel above-average wear resistance, as well as a consistently well-maintained appearance even after the toughest outings. The "NK" configuration of the ATLAS wheel does not include threaded holes for the application of a beadlock ring.

### AVAILABLE SIZE

| Size                | ET Min | ET Max | PCD Min | PCD Max | Weight (kg)     |
|---------------------|--------|--------|---------|---------|-----------------|
| <b>ATLAS NK 17"</b> |        |        |         |         |                 |
| <b>8 x 17"</b>      | -40    | 33     | 114,3   | 150     | From 14.4 to 16 |
